Reasons to Replace Your Water Heater with a Heat Pump Water Heater

1

Cut Your Carbon Footprint

Heat pump water heaters (HPWH) are the lowest carbon option for water heating. On average, they produce:

- 3.8x less carbon than standard electric
- 5.9x less carbon than natural gas
- 7x less carbon than propane
- 11.3x less carbon than oil

2

Long-Lasting

Heat pump water heaters are the most reliable water heater on the market. They are backed by an industry-leading 10-year warranty.

- Heat pump water heaters operate smoothly and don't need yearly maintenance service like oil water heaters do.

3

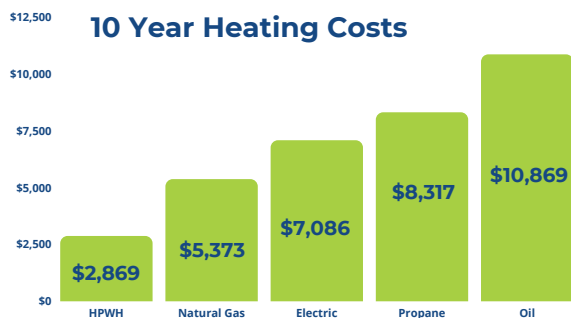

Earn a NextZero Rebate

Customers of Marblehead Municipal Light Department are eligible for a \$500 NextZero rebate with the purchase of a new, ENERGY STAR® certified heat pump water heater.

4

Save the Most Money Over Time

*Costs based on a rate of \$.18 per unit for electric, \$.251 per unit for natural gas, \$.484 per unit for oil, and \$.364 per unit for propane. Prices are from 12/27/22.
