

Through the NextZero program, Marblehead Municipal Light Department (MMLD) offers energy audits to help commercial and industrial (C&I) customers identify energy savings measures that lower energy usage and reduce energy costs. Armed with an audit report, C&I customers can create a plan with the help of a local contractor to implement energy savings measures and submit applications for rebates to help reduce the costs of measures from MMLD. MMLD offers four different types of programs to help C&I customers implement energy efficiency upgrades.

PRESCRIPTIVE LIGHTING PROGRAM

MMLD's Prescriptive Lighting Program is a fast track process for reviewing and implementing lighting projects where lighting fixtures have been identified by licensed electricians with cost quotations. The rebates are clearly identified on the application, making it easy to determine the incentive for each project.

PRESCRIPTIVE HVAC PROGRAM

MMLD's Prescriptive HVAC (heating, ventilation, and air conditioning) Program is a streamlined process for reviewing and implementing HVAC projects. This program is ideal for C&I customers who have identified HVAC improvement projects and have procured cost quotations from licensed installers.

CUSTOM RETROFIT PROGRAM

MMLD's Custom Retrofit Program is ideal for C&I customers who are interested in general energy efficiency upgrades, but do not have a specific project in mind. C&I customers submit an application to be enrolled into the program. Once the application is received, the NextZero team will work with the customer and their preferred contractors to fully define work scopes for the recommended projects, including a cost-effectiveness evaluation based on estimated annual energy savings.

NEW CONSTRUCTION AND MAJOR RENOVATION PROGRAM

There is no better time to plan energy savings than when planning a new construction or major renovation project and MMLD offers a NextZero program to help C&I customers plan such projects. C&I customers may qualify for co-funding of technical services, custom incentives, or prescriptive rebates to help maximize the efficiency of their project.
